

PISTOL GRIP APPLICATOR GUN

For manual dispensing of brazing/soldering paste

Fusion's new "pistol grip" gun attachment is compatible with FE-71 applicator guns. Comfortable grip handle, with toggle action switch, permits easy application of paste deposits. Timed control enables repeatable deposit sizes ranging from small dots to continuous stripes.

PISTOL GRIP GUN WITH TOOL BALANCER

For production dispensing of brazing/soldering paste, Fusion offers the pistol grip gun with tool balancer, which allows the gun to be suspended within easy reach of the operator. After dispensing paste, gun recoils to "zero gravity" position, permitting operator to continue work. Gun cannot be accidentally dropped, preventing damage and downtime.

Pistol grip mounting kit includes tool balancer, coiled electrical cable, power extension cable, coiled pneumatic line, and hardware. Kit is available for both gun mount paste cartridge and PVC type reservoirs.

Pistol Grip Tool Balancer mounted on Fusion Braze Mate Machine
